

OSCAR ALUMINIUM & GLASS WORKSHOP

We are Specializes in Supply & Installation Maintenance Service of Aluminium, Glass & All kinds of Aluminium and Glass, Stainless Steel Works. Now We are one of the best Aluminium & Glass Company in the City .

ABOUT OUR COMPANY

Aluminium, Glass and Mirror Manufacturers and Wholesalers in UAE manufacture a comprehensive range of High Quality Glass Products and Mirrors including decorative glass, safety glass, frameless glass systems, decorative mirrors, mist free mirrors, tempered mirrors and safety vinyl backed mirrors. Glass and mirror manufacturing companies use state-of-the-art computer controlled machinery and employ technically qualified staff who are skilled at handling various glass applications and highly experienced in making all types of mirrors. Glass and mirror wholesalers in UAE cater to the various needs of customers including architects, builders and interior designers by supplying the best quality glass products and mirrors at reasonable Rates. Alintethar Glass and Mirror sounds like the name of a glass and mirror manufacturing or retail company. They may specialize in creating or selling high-quality glass and mirror products for a variety of applications, such as home decor, architecture, or automotive industries. It would be interesting to learn more about their offerings and how they differentiate themselves from other Aluminium, glass and mirror companies in the market.

VISION

Our vision is to be the region's most trusted and innovative provider of Premium Glass and Aluminium Solutions. We strive to lead the industry through Creativity, Advanced Technology, and Sustainable practices, turning ideas into inspiring spaces.

MISSION

01

Our mission is to deliver exceptional glass and aluminium solutions that combine innovation, quality, and elegance.

02

We are committed to transforming spaces with precision-crafted products, sustainable practices, and outstanding service.

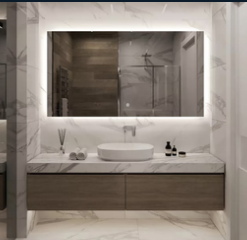

03

By blending cutting-edge design with durable materials, we aim to enhance both the beauty and functionality of residential, commercial, and industrial projects.

04

Our dedication is to exceed client expectations, build lasting relationships, and set new standards in the glass and aluminium industry.

OUR BEST SERVICES

Shower Glass

Glass Door

Led Mirror

Aluminium Window

Kitchen Cabinet

Stair Case

TEMPERED GLASS

Perfect for Residential and Commercial use.

SPECIFICATIONS

Types: fully tempered glass, heat strengthened glass, heat soaked test.

Thickness: 3mm, 3.2mm, 4mm, 5mm, 6mm, 8mm, 10mm, 12mm, 15mm and 19mm, etc.

Max. Size: 13,000mm x 3,300mm.

Min. Size: 100mm x 300mm.

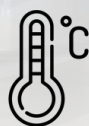

HIGH STRENGTH

about five times stronger than regular glass, more durable and resistant to breakage.

HIGH SAFETY

once tempered glass break, it shatters into small, rounded pieces, reducing the risk of injury.

HEAT RESISTANCE

withstands abrupt temperature change of 220 Centigrade, ideal for high heat applications.

CURVED GLASS

Curved glass adds elegance and fluidity.

■ CURVED TEMPERED GLASS

Thickness: 3mm, 3.2mm, 4mm, 5mm, 6mm, 8mm, 10mm, 12mm, 15mm and 19mm, etc.

Length: min. 600-max. 6,000mm.

Arch: min. 600-max. 2,600mm.

Min. Radius: 750mm.

■ HOT CURVED GLASS

Thickness: 3MM, 3.2MM, 4MM, 5MM, 6MM, 8MM, 10MM, 12MM, 15MM and 19MM, etc.

Size: min. 300x300MM – max. 10,000 x 3,000MM.

Radius: No Limit.

SPECIFICATIONS

Colors: White (Plain), Ultra White, Bronze, Grey, Blue, Green, Etc.

Technics: Acid Etched and Sand Blasted.

Thickness: 4MM, 5MM, 6MM, 8MM, 10MM, 12MM, etc.

Sizes: 1650x2140MM, 1830x2440MM, 2140x3300MM, 2140x3660MM, 2250x3300MM, 2440x3660MM, etc.

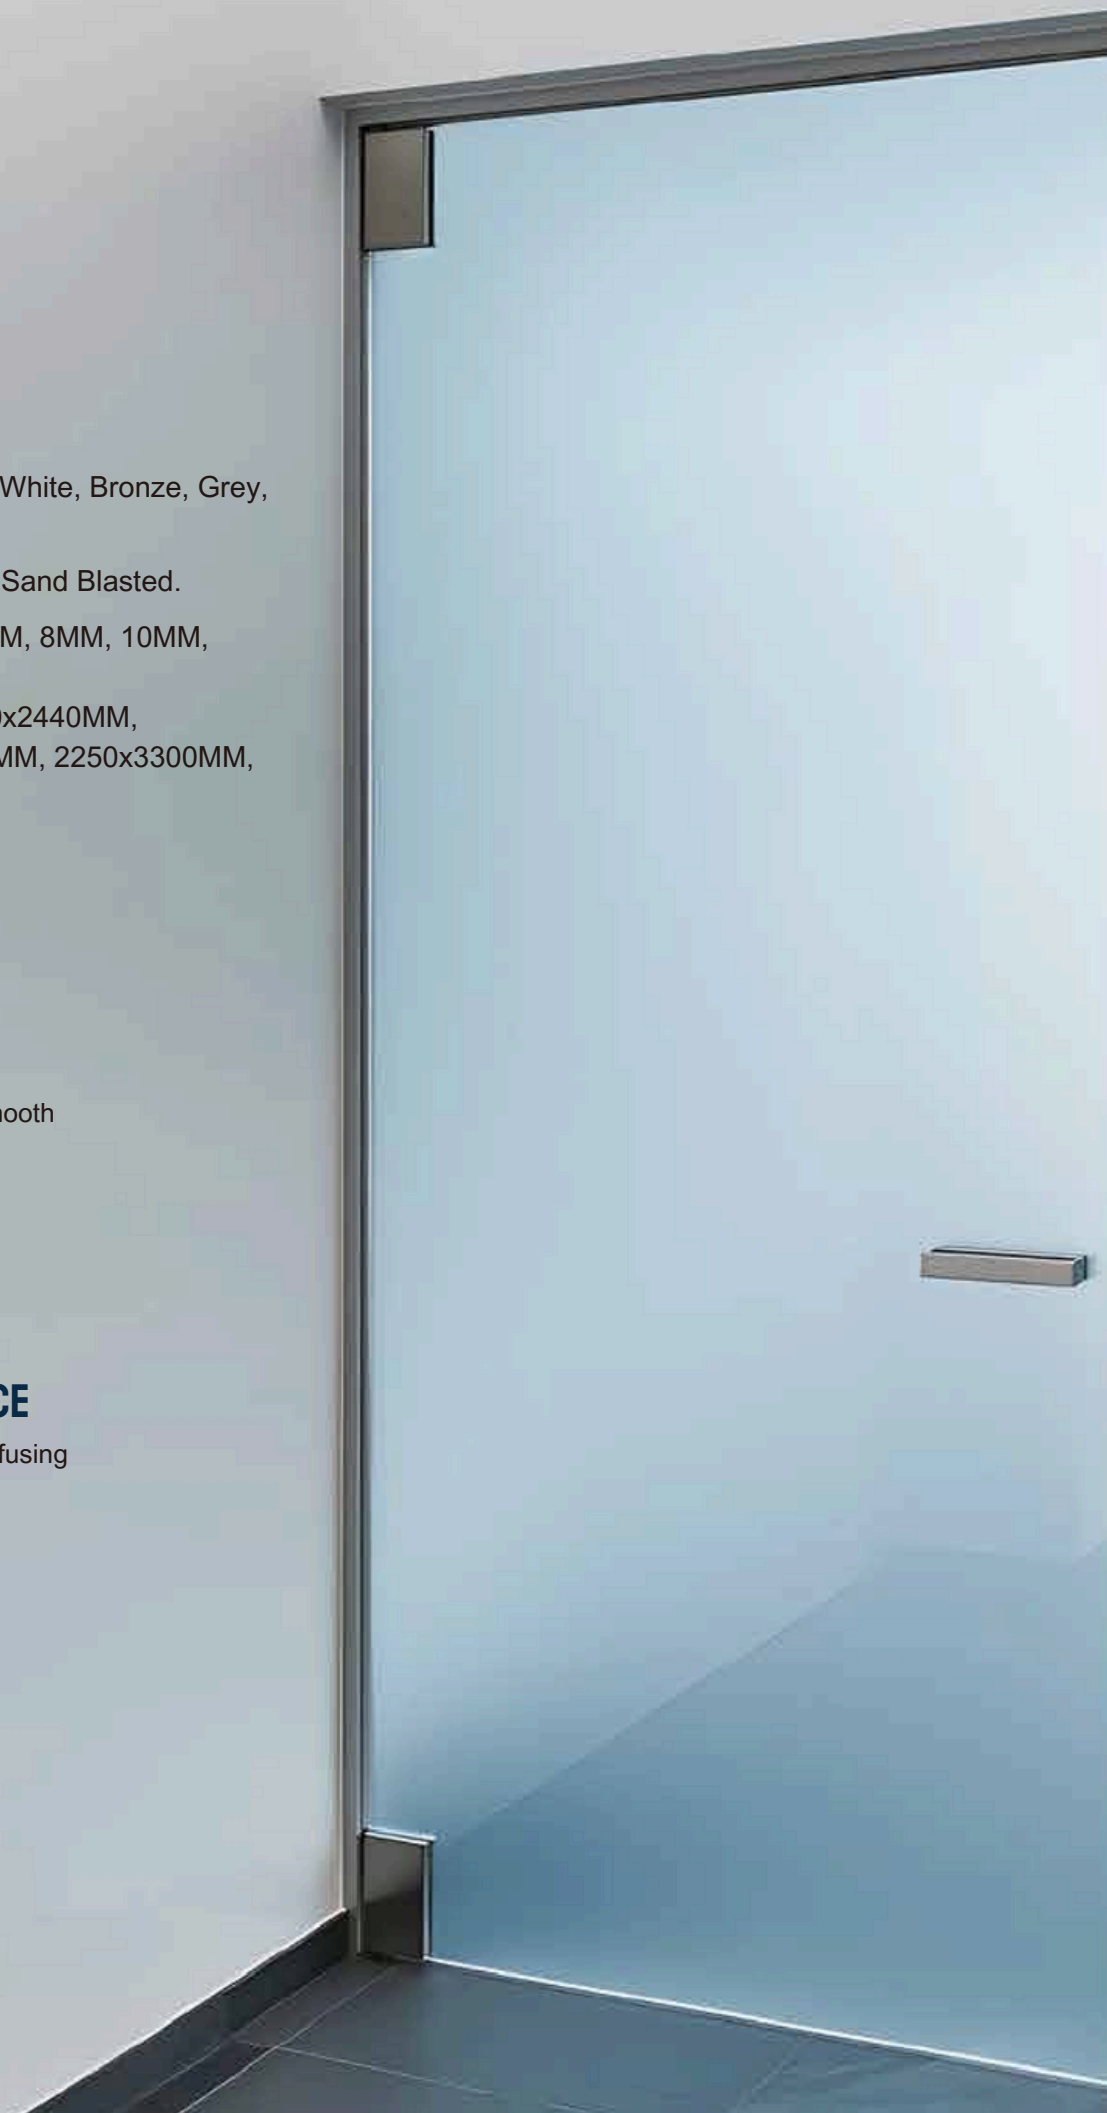

SILKY SMOOTHNESS

with a distinctive, uniformly smooth and satin-like appearance.

WARMTH AND ELEGANCE

creates a unique feeling by diffusing and emitting a certain light.

SPECIFICATIONS

Paint colors: White, Black, Grey, Green, Blue, Green, Red, etc

Glass substrate: Clear Float Glass, Low Iron Glass, Tinted Glass, etc.

Thickness: 4MM, 5MM, 6MM, 8MM, 10MM, 12MM, etc.

Sizes: 1650x2140MM, 1830x2440MM, 2140x3300MM, 2140x3660MM, 2250x3300MM, 2440x3660MM, etc.

AESTHETICS

provides a sleek and modern look that can enhance the overall appearance of any space.

HIGH RESISTANCE

resistance to humidity making it ideal for use in high humidity rooms such as kitchens etc.

LONG DURABILITY

as back painted, it is protected from damage, ensuring long durability.

LAMINATED GLASS

Layered glass for safety and security.

■ TEMPERED LAMINATED GLASS

Interlayers: PVB, SGP and EVA.

Interlayer thickness: 0.76mm, 1.14mm,
1.52mm, 2.28mm, etc.

Max. Size: 13,000MM x 3,300MM

HIGH SAFETY

If cracks, splinters will adhere to the interlayer and not scatter, keeps away the injuring.

ENERGY SAVING

Impedes the transmission of solar heat and reduces cooling loads, reduces the energy bills.

SOUND CONTROL

PVB interlayer is an effective absorber of sound, offers a quieter environment.

ANNEALED LAMINATED GLASS

PVB colors: Clear, Green, Blue, Bronze, Grey, Milk White, etc.

Thickness: 3+0.38+3mm, 3+0.76+3mm, 4+0.38+4mm,
4+0.76+4mm, 5+0.76+5mm, 6+0.76+6mm, etc.

Sizes: 1830x2440MM, 2140x3300MM, 2140x3660MM,
2250x3300MM, 2440x3660MM, 2550x3660MM, etc.

ALUMINIUM MIRROR

Rust-resistant and highly reflective.

SPECIFICATIONS

Coating: Single Coated, Double Coated.

Glass: Clear, Low Iron, Tinted, etc.

Thickness: 1.3MM, 1.5MM, 1.8MM, 2MM, 2.7MM, 3MM, 4MM, 5MM, 6MM, etc.

Back paint: Grey, Blue, Green, White, etc.

Sizes: 610x914mm, 914x1220mm, 1220x1830mm, 1600x2200mm, 1830x2440mm, 2140x3300mm, 2250x3300mm, 2440x3660mm, etc.

HIGH REFLECTIVITY

High level of reflectivity, actual and accurate reflection, high optical quality.

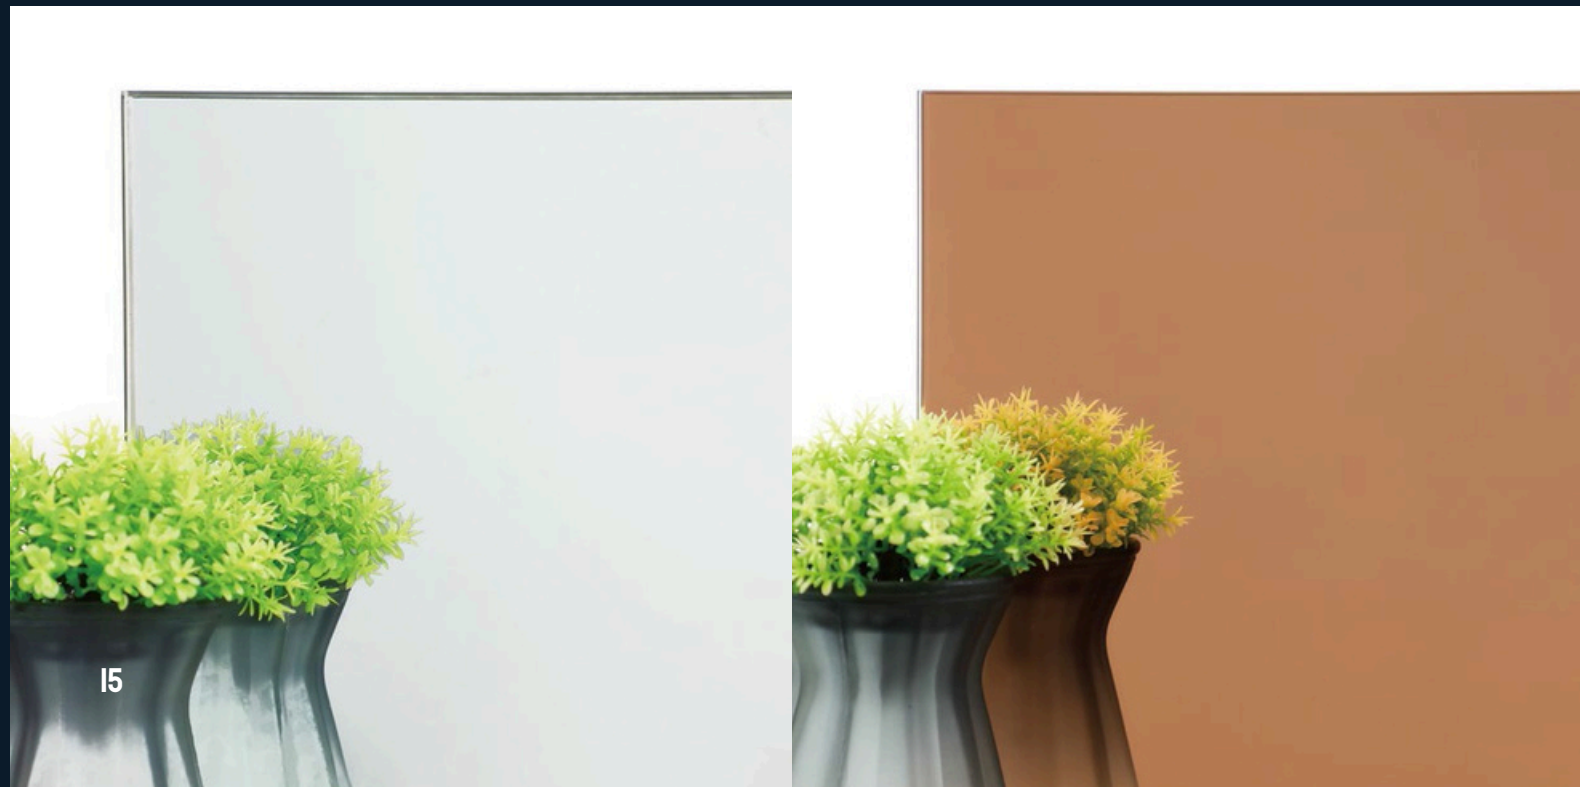

COST-EFFECTIVENESS

Cost-effective choice for home and commercial applications.

EASY PROCESSING

Easy to be cut, drilled, or beveled, could be made into decorative and furniture mirror etc.

SILVER MIRROR

Timeless beauty meets high reflectivity.

SPECIFICATIONS

Back Paint: Grey, Blue, Green, White, etc.

Glass: Clear, Low Iron, Tinted, etc.

Thickness: 2MM, 3MM, 4MM, 5MM, 6MM, etc.

Types: Silver Mirror, Copper and Lead Free Mirror, Safety Mirror, etc.

Sizes: 1220x1830MM, 1830x2440MM, 2140x3300MM, 2250x3300MM, 2440x3660MM, etc.

HIGH OPTICAL QUALITY

True image reflectance with virtually no distortion.

LONG DURABILITY

More durable and longer lasting than other types of mirror.

HIGH CORROSION RESISTANCE

Makes it ideal for use in high-humidity environments or outdoor.

GLASS SERVICES:

- 1 • POLISHING & BEVELING
- 2 • DOUBLE GLAZING GLASS
- 3 • CUSTOM GLASS DESIGN
- 4 • GLASS CUTTING (MANUAL & CNC)
- 5 • TEMPERING & HEAT STRENGTHENING

Polishing & Beveling

Polishing and beveling are two common methods used to finish the edges of glass for both functional and aesthetic purposes. Polishing: This process involves grinding and buffing the edges of cut glass to create a smooth, clear, and safe finish. Polishing removes sharp edges, reduces the risk of injury, and gives the glass a finished, professional appearance.

Beveling: Beveling is a decorative process where the edge of the glass is cut at an angle to create a sloped surface. This technique adds a sophisticated, prismatic effect that catches the light and is often used for mirrors, tabletops, and ornamental glass.

Double Glazing Glass

Double Glazing Units (DGUs) consist of two glass panes separated by a sealed air or gas-filled space, providing excellent insulation against heat and cold.

They effectively reduce external noise, making interiors quieter and more comfortable.

DGUs enhance energy efficiency, helping to lower electricity bills and maintain a consistent indoor temperature.

They prevent condensation and moisture buildup on windows, protecting frames and interiors..

Additionally, DGUs improve security by making windows harder to break. With a sleek and modern design, they add a premium look to homes, offices, and commercial spaces.

Glass Polish Edge Machine

Glass Beveling Machine

Glass Polishing

Glass Drill Machine

Silicone Installation Machine

Glass Cleaning Machine

Custom Glass Design

Custom Glass Design allows you to create unique glass solutions tailored to your style and space requirements. From decorative panels to functional partitions, every design is fully customizable.

It enhances interior aesthetics while adding elegance and sophistication to any environment. Custom glass can be patterned, frosted, colored, or engraved to match your vision perfectly.

It also offers durability and safety without compromising on style.

Ideal for homes, offices, and commercial spaces, custom glass designs combine functionality with modern luxury.

Glass Cutting (Manual & CNC)

Glass Cutting: Manual vs. CNC

Glass cutting involves two main methods: manual and CNC. Manual cutting is a skilled craft using hand tools, perfect for custom, one-off projects and artistic designs. It relies on the craftsman's expertise for a clean, precise break.

In contrast, CNC (Computer Numerical Control) cutting is an automated, computer-controlled process. A machine precisely cuts complex shapes with high speed and accuracy, making it ideal for mass production and projects requiring perfect repeatability, such as automotive or architectural glass. Both methods are essential, each serving a distinct purpose in the industry.

Tempering & Heat Strengthening

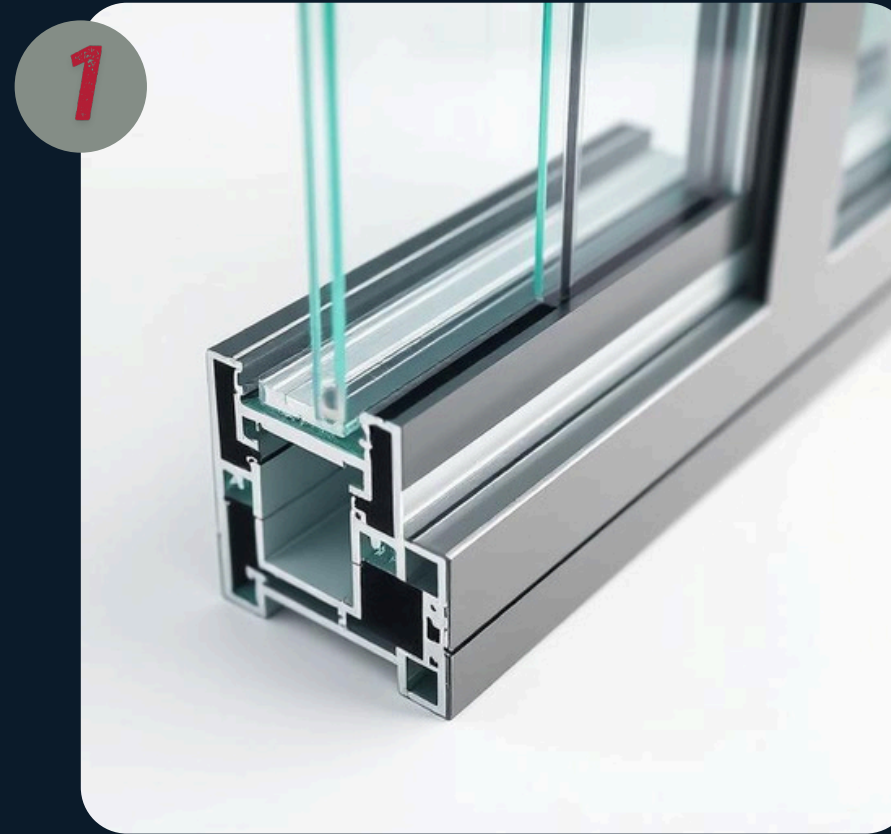

Tempering and heat strengthening are both processes used to enhance the strength and safety of glass by heating and cooling it.

Tempered Glass: In this process, glass is heated to around 650°C and then rapidly cooled with blasts of air. This makes the glass approximately 4-5 times stronger than standard glass. When it breaks, it shatters into small, blunt, and relatively harmless pieces.

Heat-Strengthened Glass: This process is similar, but the glass is cooled more slowly. It becomes about twice as strong as standard glass. When it breaks, it fractures into large pieces that tend to stay in the frame.

ALUMINIUM SERVICES:

- 1 • DOUBLE GLAZING UNITS
- 2 • CURTAIN WALL SYSTEMS
- 3 • SHOPFRONTS & PARTITIONS
- 4 • ALUMINIUM WINDOWS & DOORS

Double Glazing
Units

Double Glazing Units (DGUs) consist of two glass panes separated by a sealed air or gas-filled space, providing excellent insulation against heat and cold.

They effectively reduce external noise, making interiors quieter and more comfortable.

DGUs enhance energy efficiency, helping to lower electricity bills and maintain a consistent indoor temperature.

They prevent condensation and moisture buildup on windows, protecting frames and interiors..

Additionally, DGUs improve security by making windows harder to break. With a sleek and modern design, they add a premium look to homes, offices, and commercial spaces.

Curtain Wall
Systems

Curtain Wall Systems are modern, non-structural exterior walls that enhance the aesthetics of buildings while protecting against weather.

They allow abundant natural light, creating bright and energy-efficient interiors.

Made with high-quality glass and aluminium, they provide durability and structural stability. Curtain walls offer excellent thermal and acoustic insulation, improving indoor comfort. Customizable in design, color, and finish, they suit both commercial and residential projects.

Combining elegance, functionality, and innovation, curtain wall systems elevate the overall look and performance of any building.

Shopfronts & Partitions

Shopfronts & Partitions provide stylish and functional solutions for commercial and office spaces. They create visually appealing facades while maximizing natural light and visibility. Partitions help define spaces efficiently without compromising openness or flow. Made from high-quality Glass and Aluminium, they ensure durability and long-lasting performance. Customizable in design, size, and finish, they can match any branding or interior theme. Combining elegance, practicality, and modern design, shopfronts and partitions elevate the overall look and functionality of any space.

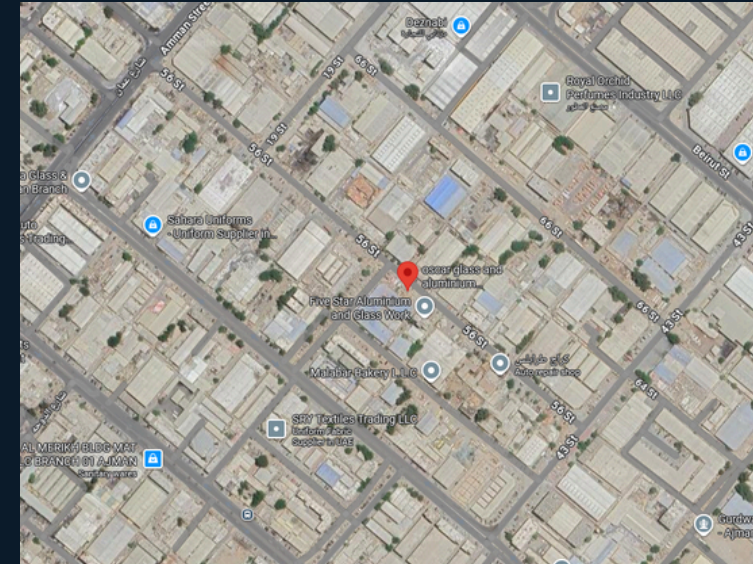

Aluminium Windows & Doors

Aluminium Windows & Doors are durable, lightweight, and corrosion-resistant, making them ideal for all weather conditions. They offer sleek, modern designs that enhance the aesthetics of homes, offices, and commercial spaces. With excellent thermal and sound insulation, they help maintain comfortable indoor environments. Aluminium frames are low-maintenance and highly resistant to wear and tear over time. They can be customized in various finishes, colors, and styles to match any interior or exterior design. Combining strength, style, and functionality, Aluminium windows and doors are a perfect long-term investment for modern architecture.
